## **COST OF FUEL SURCHARGE ADJUSTMENT**

### ***A. APPLICABILITY***

The Cost of Fuel is volatile and largely beyond the control of the utility. The cost of fuel surcharge provides a mechanism to adjust rates for the changes in the cost of fuel. The cost of fuel surcharge shall be limited to fuel used in utility-owned vehicles that are used to provide refuse service.

### ***B. COST OF FUEL ADJUSTMENT***

Invoices to customers will be increased to reflect the amounts by which the cost of Fuel Exceeds the base cost and decreased to reflect the amount by which the cost of fuel is less than the base cost in accordance set forth on Tariff Sheet No. 51.

C

### ***C. FORMULA FOR CALCULATION OF COST OF FUEL SURCHARGE***

Fuel Surcharge  $\frac{(\text{Projected Diesel Fuel Cost} + \text{Balance of Balancing Account})}{\text{Estimated Six-Month Revenues}}$  - Base Cost of Fuel

C

The Projected Diesel Fuel Cost is calculated by dividing the total number of fuel gallons used in the previous twelve months by two and multiply the averaging cost of diesel fuel per gallon during the previous twelve months.

C

The calculation for the Cost of Fuel Balancing Account Balance is based on the same calculation for electric utilities stated at 3 AAC 52.503(a). The starting balance is adjusted monthly by (1) debiting the monthly diesel fuel purchases for refuse services, (2) crediting an amount equal to total monthly refuse service sales multiplied by the percentage of fuel costs in base rates approved by the Commission and (3) crediting the total monthly fuel surcharges. The formula for this is:

1. Balancing Account Balance = Starting Balance + Cost of Fuel - (Base Rate Revenue + Surcharge Revenue)
2. Estimated Six-Month Revenues calculated by taking the sum of the sales from the previous 12 month period, divided by two.
3. The Base Cost of Fuel is a percentage constant equal to the diesel fuel cost divided by the total revenue requirement from the recently approved Revenue Requirement Study

## **COST OF FUEL SURCHARGE ADJUSTMENT (continued)**

### **D. FILING REQUIREMENTS**

The utility shall submit each cost of fuel adjustment request as a tariff filing within 60 days after the end of the second and fourth quarters. The filing shall include:

C

1. Copy of invoices supporting the purchased fuel (limited to fuel used in vehicles providing refuse service);
2. Gallons purchased by utility, by month;
3. Fluctuation analysis and explanation for changing costs;
4. The Cost of Fuel calculation;
5. Documentation in support of projected costs and revenues for the future period;
6. Calculation of monthly balances in the cost of fuel balancing account; and
7. Revised tariff sheets.

### **E. FREQUENCY OF FILING**

The Utility shall submit filings biannually to re-calculate its cost of fuel surcharge within 60 days from the end of the second and fourth quarter in each calendar year.

C

C

The utility may implement a cost of fuel surcharge that does not include a new methodology or new cost element the day after filing with the Commission. The cost of fuel surcharge filing is subject to subsequent review, adjustment, and approval by the Commission.

### **F. NOTICE**

Provided the Cost of Fuel Surcharge filing does not include a new methodology or new cost element the utility is not required to give notice under AS42.05.411. The utility acknowledges that any change to its tariff that the Commission considers to be of significant interest to the public, the Commission will require notice to the public in a form that the Commission considers sufficient for the particular changes proposed.
